

Take Command with MissionMode

Your emergency response plans have undergone extensive planning and revisions to determine the best methods of protecting the health and safety of your personnel and the general public. MissionMode equips your response team with the best vehicle to execute those plans.

MissionMode is a comprehensive crisis communications and coordination solution that dynamically enables a streamlined response for energy industry organizations. Go beyond forms-driven reporting tools and alert notification—remedy the incident with the Situation Center™.

Centralized Mitigation from Incident through Resolution and After-Action

- Test and Execute for all Scenarios
 - Unusual Event
 - Alert
 - Site area emergency
 - General emergency
- Team Notification Response and Collaboration
 - Dramatically improve team assembly time
 - Critical documents accessible immediately
 - Instant link to critical live cameras
 - Instantly download communication drill reports
- Manage responsibilities based on emergency checklists and tasks, giving accountability and ability to redirect in real time.

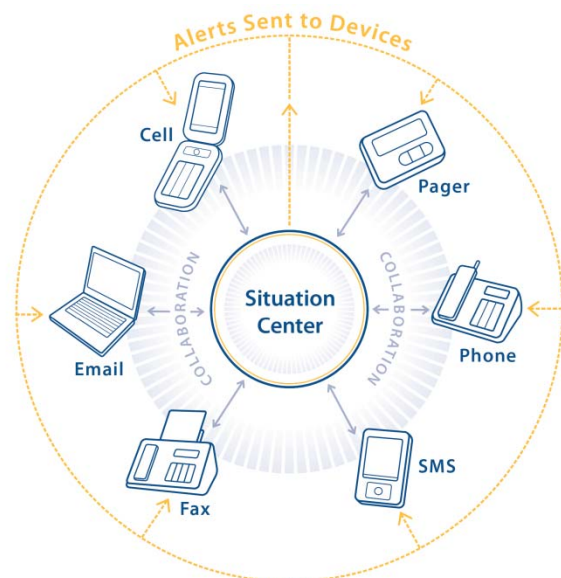

Support for the Planning Report

MissionMode gives you the ability to streamline the development, periodic review, revision and distribution of emergency plans. It is also a complete communication solution enabling you to execute unobtrusive exercises and drills, and even a full-scale response, with all pertinent people and agencies—from incident through resolution and after-action.

But no matter how many drills and exercises you run, each situation is unique. MissionMode is dynamically flexible, giving your team the ability to react to changes in the plan and resolve the challenges that can arise after an incident.

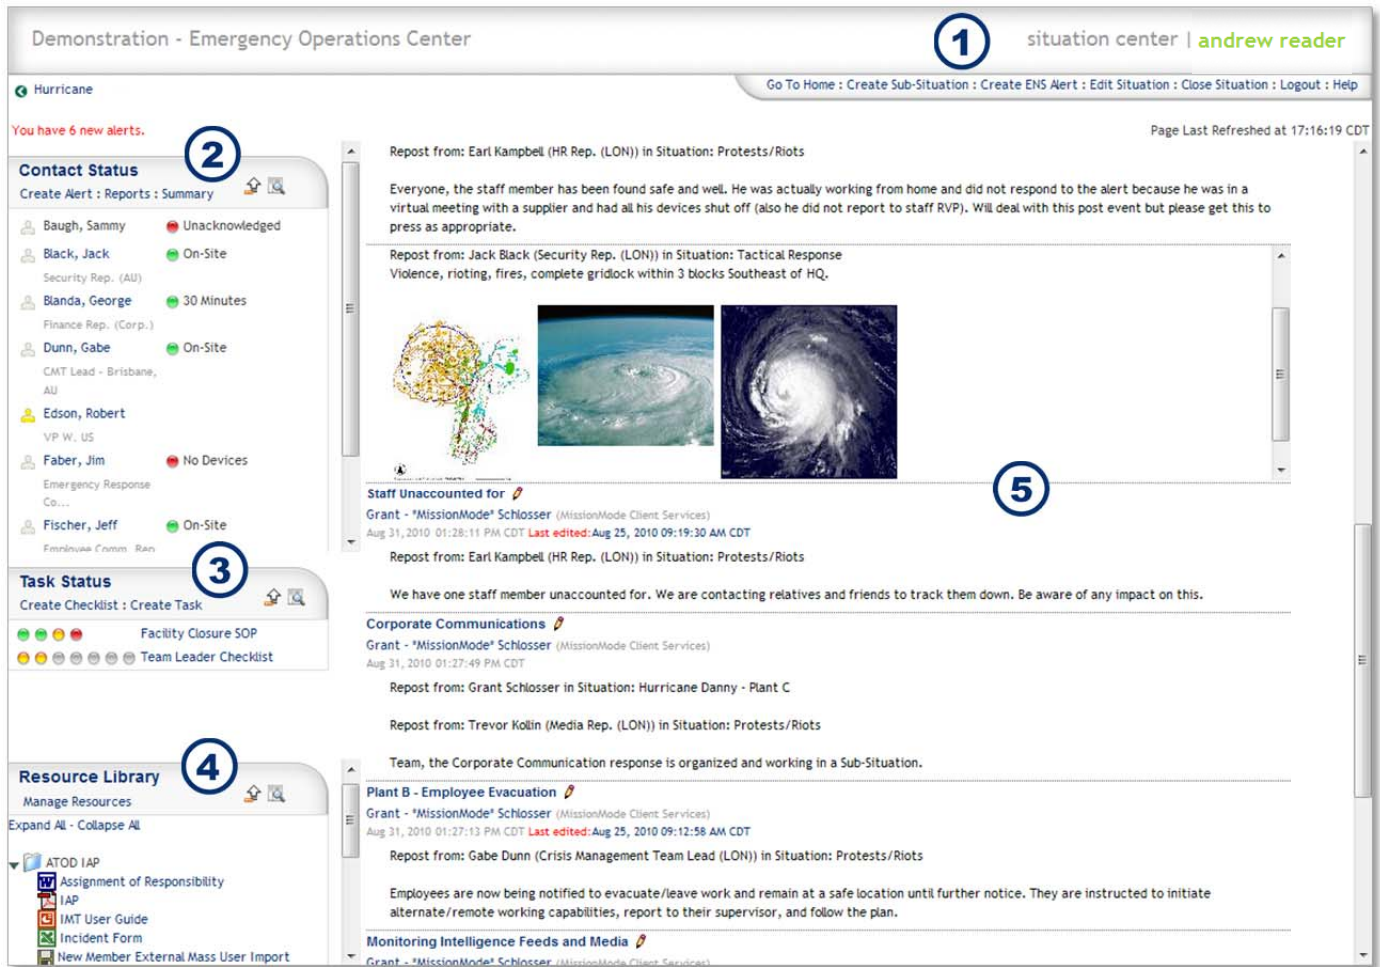

Key MissionMode Features

- Flexible and easy to use
- Online command center available anywhere, anytime via Web and mobile devices
- Enhanced alert notification with real-time acknowledgement
- Multi-modal alerts to all voice and text devices: land-line and mobile phone, Blackberry, SMS text, email, pagers and fax
- Powerful team collaboration
- Auto-audit log: time stamped accountability
- Persistent, secure messaging
- Hosted solution for low cost of entry and total cost of ownership

MissionMode allows users to receive alerts via communications devices and to collaborate with team members on incident response.

The MissionMode Situation Center Interface

1. **The Situation Center** - a virtual command center available anywhere, anytime via Web and mobile devices.
2. **Contact Status** - monitor alert progression and the status of users.
3. **Tasks and Checklists** – ensure that essential tasks are being completed.
4. **Resource Library** - the correct versions of plans, procedures, and any other type of file or link.
5. **Situation Log** - comprehensive messaging allows users to share information and come to informed decisions.
